DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a fluid container, classified in class 347, subclass 86.
- II. Claims 11-14 drawn to a method for ventilating a fluid container, classified in class 347, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the fluid container requires a ventilation port to connect the interior region in the fluid container to the ambient or a quantity of fluid required such that the fluid is prevented from wetting all of the channels, whereas the method for ventilation does not require such a ventilation port or a quantity of fluid required such that the fluid is prevented from wetting all of the channels.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
